

## **SUNTEG ENERGY® AG TO PROVIDE UNIFIED COLLABORATION WEB SERVICES TO ITS EMPLOYEES AND GLOBAL PARTNERS**

### **Sunteg Energy® AG to deploy CollabWorx's Enterprise Collaboration Server for secure-messaging, collaboration, communication and knowledge transfer**

**ROTKREUZ, SWITZERLAND and SYRACUSE, NY. – July 25th, 2002 – SUNTEG ENERGY® AG**, a global marketing and sales leader in distributing innovative renewable energy technologies announced that it is to deploy the **CollabWorx Enterprise Collaboration Server**, an advanced platform for SECURE, unified, high performance, scalable and multi-platform – messaging, collaboration, communication and distance learning.

Sunteg Energy® AG will provide its members with access to end to end, secure collaboration web services through implementation of CollabWorx's real-time collaboration and communication platform. The CollabWorx platform includes a secure Instant Messenger featuring a collaboration gateway to secure collaboration services including data-audio-video conferencing, shared applications, document sharing, screen sharing, co-browsing, white board and chat.

Chief Executive Officer of Sunteg Energy® AG, Frederick Tschenuitter said, "Providing real-time collaboration services to our global partners and customers to cost effectively and securely address comprehensive training and business communications requirements throughout our operation is a fundamental requirement for the rapid development of Sunteg Energy® AG. The CollabWorx platform will enable us to provide secure real time collaboration and communication between our employees, clients, suppliers and global partners regardless of their location. We were attracted to CollabWorx because of their superior core technology, their ability to quickly customize their solutions to our exacting requirements and the fact that they were able to offer us one integrated package that incorporated Secure Instant messaging, voice-video-data-conferencing and real-time and self-paced distance learning. Additionally, CollabWorx's voice and video over IP technology is the best performing multi-point IP based conferencing solution that we have experienced and provides a quality of service only until now achieved by deploying expensive dedicated hardware based conferencing systems. The fact that we can now instantly convene high quality-web based conferencing sessions without the need to involve any other third party service provider, deploy any expensive equipment other than web cams and PC's or purchase additional dedicated data services permits us to inexpensively and effectively collaborate in real time with our colleagues and partners around the globe."

Executive Vice president for CollabWorx, Paul Coppock said, "We are very excited that a pioneering company like Sunteg Energy® AG that is focused on such an important field as renewable energy will be deploying our 'next generation' integrated collaboration platform to their employees and partners worldwide. The management team at Sunteg Energy® AG clearly appreciates the need to adopt next generation technologies to achieve a competitive advantage."

#### About Sunteg Energy® AG

SUNTEG ENERGY is a global renewable energy marketing and sales organization. Sunteg Energy® AG has created a global transfer and innovation partnership network aiming to drive down the cost of renewable energy for consumers worldwide. To reach this goal Sunteg is developing strong innovative marketing and sales channels that guarantee product turnover to help stabilize production planning while delivering quality products to markets around the world.

Sunteg is driven by concerns about global warming, energy security, increased demand for energy worldwide - particularly in developing countries, as well as a recognition of the enormous financial potential that renewable energy provides.

Sunteg's mission is to become the global marketing and sales leader in distributing innovative renewable energy technologies for midsize and large power-generation/power-handling entities.

Sunteg is achieving its mission by building a capillary distribution system with a trained network of partners, creating channels for new products from a centralized purchasing unit and delivering products immediately and directly to the marketplace.

Sunteg Energy® AG is educating and training decision makers in government and industry to better understand the advantages and the profitability that renewable energy offers.

#### About CollabWorx

Collabworx is an end-to-end provider of Integrated, secure, high performance and multi-platform; messaging, collaboration, communication, distance learning and knowledge transfer solutions. The CollabWorx Platform is based on patented, event-sharing technology, providing secure communications for all channels of communication and collaboration. With CollabWorx, companies can deploy either off-the-shelf or customized scalable collaboration solutions at a fraction of the cost and with greater flexibility as compared to competitors' offerings.

CollabWorx Interactive is in use in a number of advanced collaborative environments for the Federal government as well as in the education and commercial sectors. Customers include NASA, US Army, Army Intelligence, Syracuse University, University of Ireland, leading Fortune 2000 customers and Collaborative Application Service providers.

The CollabWorx team spent six years on pioneering research at Syracuse University's Northeast Parallel Architectures Center, a nationally acclaimed supercomputing facility. Funded through DARPA, the team developed the first network-centric command and control environment for the USAF. The team later went on to develop the first web-based platform for person-to-person collaboration.

Today, Collabworx continues its tradition of incorporating leading-edge research into commercial products by creating the most advanced, enterprise-class solutions for secure collaboration, communication and distance learning.
